

Energy Efficiency and Natural Gas Utilities

Educating customers with energy usage dashboards & green buttons

MyPSE ONLINE TOOL

Text Puget Sound Energy (PSE) has developed an online tool, which allows PSE customers to log-in and have an interactive learning experience around their energy usage. The tool provides immediate feedback with 24-hour interval data, in contrast to the monthly billing summary provided in paper and electronic statements. The site also includes links to energy efficiency rebates and energy saving tips, as a call to action to help reduce consumption.

My Energy Usage

Save energy, get rebates and learn how easy it can be to manage your energy use! [Click here to view how, when and where you use energy.](#)

When is my energy being used?

Actual daily usage

Date	kWh	CO2
7/23/2015	28	12
7/24/2015	20	8
7/25/2015	30	12
7/26/2015	30	12
7/27/2015	22	9
7/28/2015	20	8
7/29/2015	22	9
7/30/2015	38	15

[» See More Detail](#)

How has my usage changed?

Compare with last year

Month	kWh
Jun 2014	750
Jun 2015	550

This service is available to all of PSE's electric usage customers. To support the city of Bellevue, which is competing for the Georgetown University Energy prize, PSE is including natural gas usage as well. This tool has measurable energy savings, is replicable and scalable, and encourages smart energy choices.

The PSE team is truly enjoying supporting its communities in their quest to win the Energy Prize and has found success in promoting energy efficiency activities and measures when they are tied to a unified community message.
